

# Release Notes for version 8.3.2.2

The release notes listed below contain resolutions that have been reported and resolved. New features to the application are also listed and may point you to a more detailed document that will be listed in our online knowledgebase or available from support. If you have any questions about release notes, please contact our technical support department via email or 561-969-2882 option 1.

## Accounts Receivable (FM)

### Bug

31811 Release Version 8.3.2.2 1

#### **AR - CASH RECEIPTS - Worldpay - System crash when posting transactions**

Corrected an issue for Worldpay integrated customers to prevent a system crash when posting auto cash receipts.

31860 Release Version 8.3.2.2 1

#### **AR - INVOICE/STATEMENT - PRINT A/R STATEMENT - Printing using a very large customer list prints incorrect information**

Corrected an issue whereby the printing Accounts Receivable statements for large customer lists (1500+) would result in invoice data from another A/R period printing out on some statements.

## API

### Bug

30641 Release Version 8.3.2.2 1

#### **API - CUSTOMER BOATS - Update boat UpdateDate when changing slip assignment**

When slip information was being changed for a boat, the UpdateDate field was not being correctly updated and exposed through the API for integrated partners such as BoatCloud to pull. This issue has been corrected and the date exposed for proper API functioning.

## File Maintenance

### Bug

31897 Release Version 8.3.2.2 1

#### **FM - CUSTOMERS - Cannot add payment profile using Worldpay and First Mile**

Corrected an issue whereby a stored profile would not be saved when using Worldpay and First Mile.

## Inventory Management

**Bug**

31792 Release Version 8.3.2.2 1

**IM - ORDER ENTRY - Order entry crashes when customer has a zero balance**

The system will no longer crash when creating a new order entry for a customer that has a blank balance.

31950 Release Version 8.3.2.2 1

**IM - ORDER ENTRY - Cannot print the invoice for a saved order when posting to Accounts Receivable**

Corrected an issue when creating and saving a new order, then recalling it a later time to post to Accounts Receivable, when attempting to print the invoice an error message would appear indicating that the order had been updated by another user.

**Layout Designer****Bug**

31977 Release Version 8.3.2.2 1

**LD - New Bill To/Ship To fields from Order Entry are not printing on layouts**

Corrected an issue whereby the new Bill To and Ship To information from Order Entry was not printing on layouts.

**Marina Management****Bug**

23378 Release Version 8.3.2.2 1

**MM - STORAGE PROPOSALS - STORAGE PROPOSAL MAINTENANCE - Installment date does not match balance due date**

Corrected an issue where installment dates could be changed when saving a proposal that was maintained for a billing code defined as having a single installment.

**Point Of Sale****Bug**

31793 Release Version 8.3.2.2 1

**POS - Elavon - Processing refunds caused system crash**

Corrected an issue where POS systems would crash when processing a refund through Elavon integration.

31916 Release Version 8.3.2.2 1

**POS - Locking the main screen causes system crash**

Corrected an issue where systems not integrated with Worldpay would crash upon locking the main register.

31974 Release Version 8.3.2.2 1

**POS - Sales tax date not the date ticket closed**

Corrected an issue whereby the Sales Tax date was using the entry date and not the completion date when a POS ticket was completed on a later date.
